

Analysis of Animal Exhibit Worksheet

Step 1

Animal researched in pre-activity is _____

1. How many animals do you see in the exhibit?
2. Are there any different species on exhibit with your animal?
If so, what are they?

Sketch (or take digital pictures) the above animal's exhibit below:

3. What are some things you are surprised by in this exhibit?
4. What are some things that are missing from the exhibit according to your drawings?

5. What are some things that are in the exhibit that you did not include?

6. Note any security measures they used to make sure visitors are safe and the animal will not escape.

Take **10 minutes** of time to observe the animal's behavior in the exhibit.
Note the following items:

1. How does the exhibit display animal behavior? Write down 5 specific interactions of the animal in its exhibit. If the animal is resting, note anything that would promote the behaviors you have learned about.

2. How are the four basic needs of this animal met?
 - A. Food

 - B. Water

 - C. Shelter

 - D. Space.

3. What methods of sanitation are used?
4. How is vegetation used?
5. If there is a lack of vegetation, what could be the reason for this?

Step 2

You will now go to an animal's exhibit you have not studied. Answer the following questions:

1. How many animals do you see in the exhibit?
2. Are there any different species on exhibit with your animal?
If so, what are they?

Sketch (or take digital pictures) the above animal's exhibit below:

3. What are some things you are surprised by in the exhibit?

7. Note any security measures they used to make sure visitors are safe and the animal will not escape.

Take **10 minutes** of time to observe the animal in the exhibit. Note the following items:

1. What methods of sanitation are used?

2. How are the four basic needs of this animal met?

a. Food

b. Water

c. Shelter

d. Space.

3. How is vegetation used?

4. If there is a lack of vegetation, what could be the reason for this?

6. How does the exhibit display animal behavior? Write down 5 specific interactions of the animal in its exhibit. If the animal is resting, note anything that would promote the behaviors you have learned about.
5. List four other observations about the exhibit design. For each one, give a reason why they have included this in the design of the exhibit.
- A.
 - B.
 - C.
 - D.
